Professional Summary

Passionate and results-driven Computer Science student with strong experience in building AI-powered applications, full-stack development, and data analysis. Quick learner, collaborative, and highly motivated to solve real-world problems using technology.

Technical Skills

- Programming: Python, Java (OOPs), C, JavaScript, PHP
- Web Technologies: HTML, CSS, JavaScript, React, Flask, Flask-CORS
- Libraries/Tools: Pandas, NumPy, Matplotlib, OpenCV, TensorFlow (learning), Git-Hub, VS Code
- Databases: MySQL
- AI Tools: ChatGPT, Claude, Cursor, Huggingface, Gemini, AI Agents (exploring)

Projects

AI Healthcare Chat Model

- Built an AI chat model using Apollo 1.5B model (HuggingFace), React frontend, Flask backend with CORS
- Identifies possible health issues based on user symptoms
- Handled entire development lifecycle: frontend, backend, integration, and testing
- Built to provide accessible and free AI healthcare assistance for all users

Heart Disease Prediction Model

- Developed with team using Python to predict heart disease from user responses
- Implemented data preprocessing, model training, and result analysis
- Collaborative project showcasing data science and teamwork skills

Education

Bachelor of Computer Application

Anand Engineering College, India | Graduation: 2023- 2026

Soft Skills

- Problem-solving, Teamwork, Fast learner, Time management, Communication
